Series : ADDITIVES
**FLUORESCENT SOLVENT-
BASED PASTE**

Reference : TCF-B

TECHNICAL DATA SHEET

Version : 15/02/2023

TYPE OF PRODUCT AND APPLICATIONS

Concentrated fluorescent pigment pastes allow the preparation of fluorescent paints and clearcoats easily and quickly. They are compatible with all solvent-based binders and clearcoats. They are made from micronized pigments offering high color intensity.

FIELD OF APPLICATION

For bodywork, decoration and industry. Temperature resistance 200°C.
Pigments sensitive to sunlight. Avoid prolonged exposure to the sun.

COMPONENTS AND MIX

Add 14-20% by total weight in high solids resins, binders and clearcoats.
Disperse, then filter before use.

PHYSICAL AND CHEMICAL CHARACTERISTICS

Aspect	Vivid colors
Product density	1,02 Grs/cm ³ ± 0,05
Solids rate calculated by weight :	51 % ± 2
Pot Life Mix :	Unlimited
Theoretical yield	100g = 3/3,5m ²
VOC	+420g / L

APPLICATION SYSTEMS

Suitable for all types of paints, for spray, airbrush, airless, roller and brush application.

STOCKAGE ET CONDITIONNEMENTS DISPONIBLES

250g / 1 kg / 4 kg L
Maximum storage time :

6 MONTHS IN A TIGHTLY CLOSED CONTAINER
